

**Founded in 1997**  
**Based in Fremont, CA**

**Solutions we offer:**

- Data Center Computing
- Cyber Security
- Big Data
- Virtualization
- Cloud Computing
- Unified Communications
- Wireless / Mobility
- Storage
- Enterprise-Wide Print Management
- Document Management

**4179 Business center Dr**  
**Fremont, CA 94538**

New Tech Solutions, Inc. (NTS) is a privately held, minority-owned, Small Business company headquartered in Fremont, California, and a leading Silicon Valley based Information Technology Solutions and Service provider to Federal and other Public Sector Government Agencies.

NTS solutions include Data Center Computing, Cyber Security, Cloud Computing, Unified Communications, Big Data, Virtualization and Storage. Our experts can help you plan and deploy technology that meets the highest standards for quality. NTS also specializes in manufacturing energy efficient custom configured High Performance Computing (HPC), AI/ML solutions, complex data storage, and highly efficient graphical and visualization computing solutions, to name a few.

In addition, NTS also provides an innovative problem - solving approach to IT solutions. By utilizing our array of professional IT services, you can receive the guidance and expertise you need to ensure your project is customized to your unique needs and a success. We specialize in: Enterprise Architecture, Software Development, Enterprise Application Integration and Migration, and Network Performance Management.

The NTS collaborative approach throughout the whole lifecycle of your project, produces an exceptionally customer-focused and efficient solution. For our customers in the Federal government, we handle large contracts, such as: GWAC's, Blanket Purchase Agreements (BPAs), Indefinite Delivery, Indefinite Quantity (IDIQ) contracts and GSA Multiple Award Schedules (MAS). Federal IT purchases can be complex. We simplify the process: from contracts to deployment.
