

CAPABILITY STATEMENT

SD3IT

SD3IT

Established in 2014, SD3IT stands out as a Small Business, EDWOSB, and HUBZone certified solution aggregator with its headquarters in Seffner, Florida. We are dedicated to delivering innovative solutions for our Federal and DoD clientele. Our profound expertise in emerging technologies, robust manufacturing alliances, and a team of adept professionals distinguish us in the field. Our commitment to industry standards and best practices empowers us to serve as a dependable advisor, bringing the power of information to secure our digital future.

SD3IT's team, rich in federal and defense sector expertise, excels in market research, procurement efficiency, and customer-focused support. Our solutions are not only scalable and cost-effective but also delivered within optimal timeframes to enhance client operations across diverse environments, ensuring a seamless experience from inception to completion.

CORE Capabilities Summary:

Data: Includes data center, AI, geospatial analytics, network services, data migration and validation, access control, machine learning, cybersecurity measures, data storage, backup, recovery, and efficient power management.

Cybersecurity: Encompasses threat analysis, system authorization, secure deployment, identity management, continuous monitoring, threat mitigation, vulnerability assessments, and adherence to Zero Trust principles.

Cloud Solutions: Offers readiness evaluation for cloud computing, design and implementation of public, private, and hybrid clouds, along with SaaS, and comprehensive cloud storage and services.

System Integration: Involves system assessment, architectural design, infrastructure consolidation, enterprise and logistics solutions, network validation, kitting, deployment, training and virtualization services, TAA compliance.

SD3IT supports the United States Navy NIWC Pacific to provide comprehensive multi-vendor solutions, supporting critical missions with research, development, and configuration services. Our expertise spans across CTB, Aegis, and BMD systems, ensuring real-time coordination, procurement, and strategic insights to enhance our clients' operational readiness and future planning.

SD3IT designed and implemented a scalable Hyperconverged (HCI) solution to efficiently support USCENTCOM's 3000+ endpoints and 9000+ operators, including those with advanced graphics and video needs. Our expert team also delivered comprehensive on-site support, data migration, and training for enterprise lead engineers and administrators.

SD3IT's business development team conducted ARS market research to transition USDA's phone systems from traditional PBX to Unified Communications. This supports USDA's digital infrastructure enhancement with innovative storage and compute technology, furthering their mission.

SD3IT creates efficient multi-vendor solutions tailored for Raytheon's needs, focusing on robust yet streamlined designs that require minimal personnel. Utilizing innovative virtualization technologies, SD3IT provides cost-effective, future-ready, and standardized HCI solutions like VMWare and VSAN for Raytheon's diverse clientele.

SD3IT collaborates with the Bureau of Labor and Statistics to strategically deploy and implement advanced computing technology, enhancing critical business operations and customer experience.

"SD3IT has been an excellent collaborative partner delivering critical custom business requirements with real time logistics, post-delivery support and an eye on the future for mission reliability. The entire team has been instrumental in supporting the warfighter readiness." NIWC Pacific
