Overview

Hopewell Security delivers cutting-edge cybersecurity, networking, and cloud solutions that enable government agencies to implement mission-critical IT infrastructure. With a specialized focus on AI-driven threat intelligence, information security operations, and supply chain risk management, Hopewell ensures resilient, future-proofed federal IT operations through deep expertise in cybersecurity, AI, and cloud technology.

Approach

Hopewell Security takes a methodical, framework-driven approach to federal IT modernization. Utilizing tailored implementations of architectures like Zero Trust, Hopewell builds mission-enabling systems that prioritize security efficacy, scalability, and interoperability. With domain knowledge across networking hardware, sensor technology, and software/cloud platforms, Hopewell provides informed, cost-efficient solutions that align with agency goals and budgets. Every recommendation is grounded in analysis to support long-term operational resilience and risk mitigation.

Collaboration & Implementation

Hopewell Security emphasizes stakeholder-driven implementation, working closely with agency personnel to ensure smooth deployment and user adoption. Through advanced cybersecurity products that enable continuous monitoring and real-time analytics, Hopewell equips agencies with actionable insights and a strengthened security posture—critical for sustaining mission continuity in evolving threat landscapes.

Core Capabilities

- **Cybersecurity & Zero Trust:** Identity security, AI-driven threat detection, Data Loss Prevention (DLP)
- **Cloud & Enterprise IT:** FedRAMP-compliant CASB, secure cloud migration, hybrid cloud governance
- **Networking & Communications:** SD-WAN, SASE, secure communications, network modernization
- **Sensor & Endpoint Security:** IoT protection, risk-based access control, AI-enhanced threat monitoring

NAICS Codes

541519, 541511, 541512, 541513, 513210, 518210, 423430, 334111, 334112, 334118

Past Performance

At GSA, Hopewell Security provided the **Presidential Transition Team** with fully managed, FedRAMP High-authorized cybersecurity solutions for cloud, endpoint and mobile protection. In addition, Hopewell conducted an in-depth Analysis of Alternatives for GSA to identify a new, cloud-based endpoint security solution that aligned with M-21-31 requirements and supported the agency's Zero Trust objectives. The selected solution continues to be rolled out across GSA's infrastructure, with Hopewell providing ongoing support.
